AUTHORISED REFURBISHMENT CENTRE

An Innovative Initiative In The Pumping Industry

COMPLETE PUMPING SOLUTIONS IN YOUR VICINITY**KIRLOSKAR BROTHERS LIMITED**

Authorised Refurbishment Centre (ARC)

Why ARC?

- Primarily to provide proactive service and support for KBL end user
- The core objective is to get closer to KBL's valued customers
- To provide Comprehensive service facilities
- Availability and use of genuine spare parts
- Service or repair of Small & medium industrial pumps, without sending it to the factory
- Corrective maintenance and repair of pumps by a speedy and convenient process
- Cost effective, time saver for improving product efficiency
- Restore efficiency of old equipment's with KBL extended warranty support
- An all-time Training Centre to train all pump end users in vicinity
- Driven by skilled technician professionally trained under KBL guidance

KBL's Authorised Refurbishment Centre will always stand firm as a reliable source to support all its bulk pump users by continuously implementing upgraded methods to increase efficiency of pumping equipments

Authorised Refurbishment Centre Offers

- Pump testing
- Hydro testing
- Performance enhancement
- Corrocoating of wet & hydraulic pump components
- Conducting Energy Audits of Pumping related machineries
- Undertaking Annual Maintenance Contracts for repairs of Pumps
- In house overhauling facility for pump repairs
- Dynamic balancing of impeller
- Shot blasting & painting as per KBL Standard
- Onsite services with entire tools-tackles, machineries & manpower back up
- Suggestion for Material up gradation for suitable application
- Necessary retrofitting to enhance equipment reliability
- Imported equipment replacement by reverse engineering

Genuine Spares for Genuine Peace of Mind

Genuine spares are available at all our Authorised Refurbishment Centre's across India for ensuring longer pump life and enhancing energy efficiency.

Why Corrocoat

Glass flake coatings help to conserve energy while running the pump

Benefits are:

- Reduction of frictional losses
- Improvement in hydraulic efficiency
- ROI is less than 6 months
- Have potable water certification from national & international improved laboratories

Pump Energy Assessment And Solutions

- Identify potential areas in pumps and pumping systems for energy savings by carrying out detailed pump energy assessment by Certified Team of Energy Auditors
- Identify actions for improving energy efficiency
- Helps to reduce manufacturing costs and become cost competitive
- Helps to improve bottom line of your company
- Sustainable solutions

The difference between "Observed Performance" & "Best Practice" is the potential for energy savings

We are ESCO Grade 2 company certified by Bureau of Energy Efficiency (BEE)

One Stop Shop for Complete Pumping Solutions
