

Enriching Lives

KBL has provided pumpsets for Obra “C” Extension Thermal Power Station

KBL’s significant contributions to the renowned Obra ‘C’ Extension Thermal Power Station, a high-profile 2X660 MW project, prove to be an excellent advancement for the state of Uttar Pradesh. The expertise shines through the successful commissioning of 2 Concrete Volute Pumps (CVPs) for circulating water application and 4 End-suction pumps (KPD) for seawater application. With these significant contributions,

KBL continues to play a pivotal role in fortifying and enhancing the water infrastructure of our beloved nation, India.
