## KBL Contributes to NTPC's Darlipali Super Thermal Power Station

Kirloskar Brothers Limited (KBL) accomplished the installation and commissioning of three Vertical Turbine (VT) Pumps at National Thermal Power Corporation's (NTPC) Darlipali Super Thermal Power Station. Situated in Darlipali, Sundergarh District of Odisha, this project is a monumental endeavour spanning 3000 acres, for supplying electricity to Odisha, West Bengal, Bihar, Jharkhand and Sikkim.

Previously KBL had also supplied the power station with a Circulating Water (CW) system providing Concrete Volute Pumps (CVP), Raw Water (RW) VT pumps and Make-Up Water (MUW) VT pumps for the scheme. KBL's recent achievement further solidifies its reputation as a reliable partner in power infrastructure development.
