

Enriching Lives

Bolstering Narmada-Kshipra Link Multipurpose Project with Vertical Turbine (VT) Pumps

Kirloskar Brothers Limited (KBL) continues its significant contribution to the Narmada-Kshipra Link Multipurpose Project, led by the Government of Madhya Pradesh to transform Ujjain and Shajapur districts by supplying 15 state-of-the-art VT pumps. The main objective of this project is to address water scarcity in the upper Chambal basin by distributing water for irrigation to 30,000 hectares of land using

efficient canal systems that minimise wastage.

These VT pumps facilitate water transfer between Narmada and Kshipra rivers, support hydropower generation and promote industrial growth while advancing clean energy initiatives. KBL remains committed to advancing India's infrastructure goals and fostering socio-economic progress.
