## **CIRCULARITY AND WASTE MANAGEMENT POLICY**

We value environmental resources and acknowledge the concept of circular economy which improves business efficiencies along with reduction in primary resource consumption and waste generation.

To uphold our value of “Commitment towards the Environment”, we shall adopt circular economy and sustainable waste management practices across our businesses and value chain.

To achieve this, we shall strive to -

1. Adhere to the 6R (refuse, reduce, reuse, recycle, recover and responsible disposal) principles to effectively manage material resources and the waste
2. Minimise the waste being sent for incineration or disposal in landfills
3. Conserve natural resources and explore use of recycled material
4. Explore innovative strategies and solutions to minimise the quantity and toxicity from the waste generated across our business operations
5. Guide customers about responsible treatment of our products at its end-of-life stage
6. Meet our obligations under Extended Producer Responsibility (EPR) regulations
7. Comply with applicable legal & other regulatory requirements related to use of resources and waste management
8. Actively engage with our employees and value chain partners to promote awareness about circularity and waste management practices

**WE AIM TO ENHANCE USE OF RECYCLED MATERIAL IN OUR INHOUSE PROCESSES ABOVE 50% AND ACHIEVE ZERO WASTE TO LANDFILL STATUS FOR OUR MANUFACTURING PLANTS BY 2030 !**

  
Sanjay C. Kirloskar
