EMISSION MANAGEMENT POLICY

We recognise that climate change is a significant threat to our planet and requires immediate action.

To uphold our value of "Commitment towards the Environment", we shall combat the climate change by taking measures to minimise the impact of our operations, communities and value chain on the environment.

To achieve this, we shall strive to -

1. Implement innovative technologies and adopt eco-friendly practices in our operations and value chain
2. Develop a roadmap to reduce scope 1, 2 and 3 greenhouse gas (GHG) emissions
3. Control non-GHG air emissions and implement measures to improve air quality
4. Continue our Product Stewardship through design of low carbon footprint and energy efficient products
5. Implement Energy Policy to reduce energy usage related emissions
6. Comply with applicable legal and other regulatory requirements with respect to air and GHG emissions
7. Partnership with government bodies, climate advocacy groups, local communities for mitigation of climate change
8. Actively engage with our employees, society and value chain partners to promote awareness about reduction of GHG and air emissions

WE AIM TO BECOME CARBON NET ZERO BY 2047 !

Sanjay C. Kirloskar
Chairman & Managing Director
