## KBL Supports 24/7 Water Supply Initiative for Navi Mumbai

Kirloskar Brothers Limited (KBL) is proud to support Navi Mumbai Municipal Corporation's (NMMC) ambitious 24/7 water supply scheme by supplying Vertical Turbine (VT) pumps. This phased water supply scheme aims to ensure uninterrupted access to clean water for the city's residents. NMMC currently provides 470.43 million litres (MLD) of water per day to over 1,27,000 residential users across eight wards. With a

vast transmission and distribution network of pipelines, this project is crucial in meeting the city's growing water needs. KBL's high-performance VT pumps will play a vital role in ensuring efficient operation of this water distribution system. By partnering in such vital urban initiatives, KBL continues to support efforts to enhance water management and community well-being while promoting sustainable practices.
