Powering Innovation: KBL's Vertical Turbine Pump Fuels India's Nuclear Research Advancements

Kirloskar Brothers Limited (KBL) has successfully commissioned a Vertical Turbine (VT) Pump for High Flux Research Reactor (HFRR) in Vizag. This pump plays a crucial role in ensuring seamless fluid circulation, a vital component for the reactor's efficient operation.

By ensuring reliable cooling and operational stability, KBL's high-performance, mission-critical pumping solutions contribute to India's self-reliance in nuclear technology and energy innovation.
