

Enriching Lives

KBL's Vertical Turbine Pumps at Phoenix Mill Pumping Station Ensure Reliable Water Supply

Kirloskar Brothers Limited (KBL) has successfully installed and commissioned five Vertical Turbine (VT) pumps at the Phoenix Mill Pumping Station for the Municipal Corporation of Greater Mumbai (MCGM).

These pumps are designed for municipal water supply, ensuring efficient and uninterrupted water distribution to the city. The robust construction of VT pumps, makes

them ideal for continuous operation. Their easy installation feature allows for setup without disturbing existing piping, while their availability and interchangeability ensure cost-effective maintenance with readily available spare parts.

This project underscores KBL's commitment to providing innovative and reliable water management to enhance water security for Mumbai and supporting urban infrastructure.
