

Enriching Lives

Catalysing India's Nuclear Future with Cutting-edge Pumping Solutions

Kirloskar Brothers Limited (KBL) has successfully commissioned eight Metallic Volute Pumps (MVP) at a power plant in Rajasthan. These specialised pumps are designed to meet the stringent quality requirements of nuclear power plant operations, ensuring reliable coolant circulation.

This achievement reinforces KBL's commitment to supporting India's clean energy ambitions with cutting-edge engineering excellence. KBL is a trusted partner in India's nuclear power infrastructure, contributing to the nation's self-reliance on energy production.
